VISTA INTERACTIVE TELEVISION FOR HOTELS

Copyright © 2011. All Rights Reserved.

VISTA itv is an interactive Tv system specially designed for Hotels, offering information and entertainment services to improve in-room guest's experience!

WELCOME CHANNEL

This channel tunes automatically every time the guest turn the TV, regardless the channel it was tuned last time. Good for hotel branding and bring special information to guests, ideal for event's Schedule, special restaurant menus

PAY PER VIEW*

Our PPV service includes a cutting edge technology 4 channels generator along with the best Hollywood and Adult content available for hospitality market, this service allows guests to "open" extra channels to enhance the regular channel lineup offered by the hotel as "Free To Guest" programming.

LANGUAGES

Guest will be able to choose the language for all the information screens as well as sub-titles in movies. PMS interface also can retrieve the guest's language and automatically set it as checkout.

VISTA itv

SYSTEM TOPOLOGY

The system consist in a special range of hardware and software that works over the hotel network platform. Central servers and IPTV to control and transmit IPTV signals, as well as IPTV terminal and remote control for room's TV, energy control module are optional for energy savings and guest comfort.

Improve your hotel's services and operations with VISTA itv!

HOUSE KEEPING

House Keeping staff can use the TV set to report the room status (clean, dirty, something broken or damaged, etc...) this feature is faster and easier to use than the telephone and allows to report more information valuable to departments as maintenance, IT, etc...

MAINTENANCE CONTROL

Related to House keeping, this feature store all the reports of failures in rooms, setting the date and time of the report, this way maintenance manager can dispatch the service and measure the time of response and solution, closing the case in the system when is solved. **Our VISTA itv solution is also a General Room Maintenance Control System!**

VistaCloud CONTENT MANAGER

VISTA itv content is managed over a Cloud based content manager system, allowing administrators to upload all the content in system for one or a group of hotels (text, images, videos, rss source, messages and other system settings)

LOCAL SYSTEM ADMIN CONSOLE

Local console allows installers and maintenance to monitor every TV set installed in hotel network, also retrieve information regarding communication between VISTA itv server and TV sets, Change TV sets, Install new TV sets, configure PMS interface, guest system usage, and many others.

PARENTAL CONTROL

Guest will be able to block direct access to adult content or any service with purchase involved, this control is also used as corporate or group rates where interactive service are not included or not allowed.

VIRTUAL CITY TOUR*

Interactive informational screens with details for every city attractions, divided by categories as "Night Live", Shopping, Museums, Banks, Parks and many others. Virtual City Tour helps the guests to be well informed with the confidence of visiting a place recommended by the hotel. For hotel is a clear financial and operational advantage, reducing phone calls and concierge duties.

HOTEL INTERACTIVE GUIDE

VISTA itv brings a fully interactive hotel guide in order to allow guests to learn in detail about all the hotel services and facilities, similar to Virtual City Tour, but with the ability to make reservations, ask for room upgrades or any other assistance guest might need.

VIRTUAL SHOPPING*

Just like an On Line Store but better!!! Guest can buy products or services at any time from their rooms and pay with its same hotel accounts. This platform requires a logistic and commercial operation in order to have products in stock available at the hotel. Local VISTA integrator can develop this business.

EMERGENCY CHANNEL

The Emergency Channel system is able to turn every TV ON in the hotel TV network and display the emergency details (Fire, Earthquake, riots, etc), Vista offers integration services to develop interfaces with hotel security systems.

CORPORATE / GROUP CHANNEL*

VISTA itv system is able to generate a private TV channel for a group of rooms, regardless room locations, this system is ideal for Corporate, Tours or Family Groups. Customers bring their content and hotel activate the service to transmit their content to their rooms.

INTERNET ACCES*

Guest will be able to navigate any Internet site with the TV, run useful applications as Google Maps, Emails, Social networks and any other site.

ROOM CONTROL MODULE*

With VISTA itv room control module, guest can turn Lights ON and Off, set room status as "Do Not Disturb / Make Up Room", control curtains, turn coffee machine On and many others.

MESSAGING

Guests receive on the TV, all messages from hotel staff, giving valuable information regarding visitors passing by, phone calls, special invitations for happy hours or any other event, every message the hotel needs to send to one or all guests. This system is perfect to stop distributing printed material to rooms.

WEATHER

Fast and Easy! Guests can consult local weather forecast and any other city in the world. Our weather app is optimized by LG for VISTA itv solutions.

NEWS

Guest can review local and international news using our friendly interactive application. We realized that travelers have to charge their mobile devices after a working or pleasure day...This "OFF LINE" time is covered by VISTA

EXPRESS CHECKOUT

Guest can review its room account with details, also activate the Express checkout the night before leaving, this feature saves plenty of time to guests and operational costs to hotel, improving guest experience and hotel efficiency.

GUEST SATISFACTION SURVEY

Hotel can configure a survey to be filled by guest in a very comfortable way, The survey result is sent in real time to managers according to guests opinions. This real time system allows the hotel to improve services while guests still staying in.

MINI BAR INVENTORY CONTROL

This is a back office application that allows Mini bar staff to set guest consumption using a TV app in real time, results are stored and also to PMS (optional). This feature improve minibar information managing.
