Multi-Channel, Multi-Point TV solutions

We offer integrated solution for multipoint TV signal systems, known as MATV (Master Antenna Television). Specially designed to comply with the most demanding hotel's quality international standards, assuring the best signal quality in every room, based on a low maintenance network.

Regardless the TV service provider, the hotel should count with its own TV network in order to assure the best quality possible and be able to switch from providers in case it is needed without depending on third parties to take this decision.

www.vistatd.com

MATV solution can be deployed on any existing hotel network and any available formats!

- **Analog over coaxial networks (legacy)**
- **Digital over coaxial networks, SD and HD channels**
- **Hybrid analog/digital**
- **IPTV over existing LAN**

System Certification

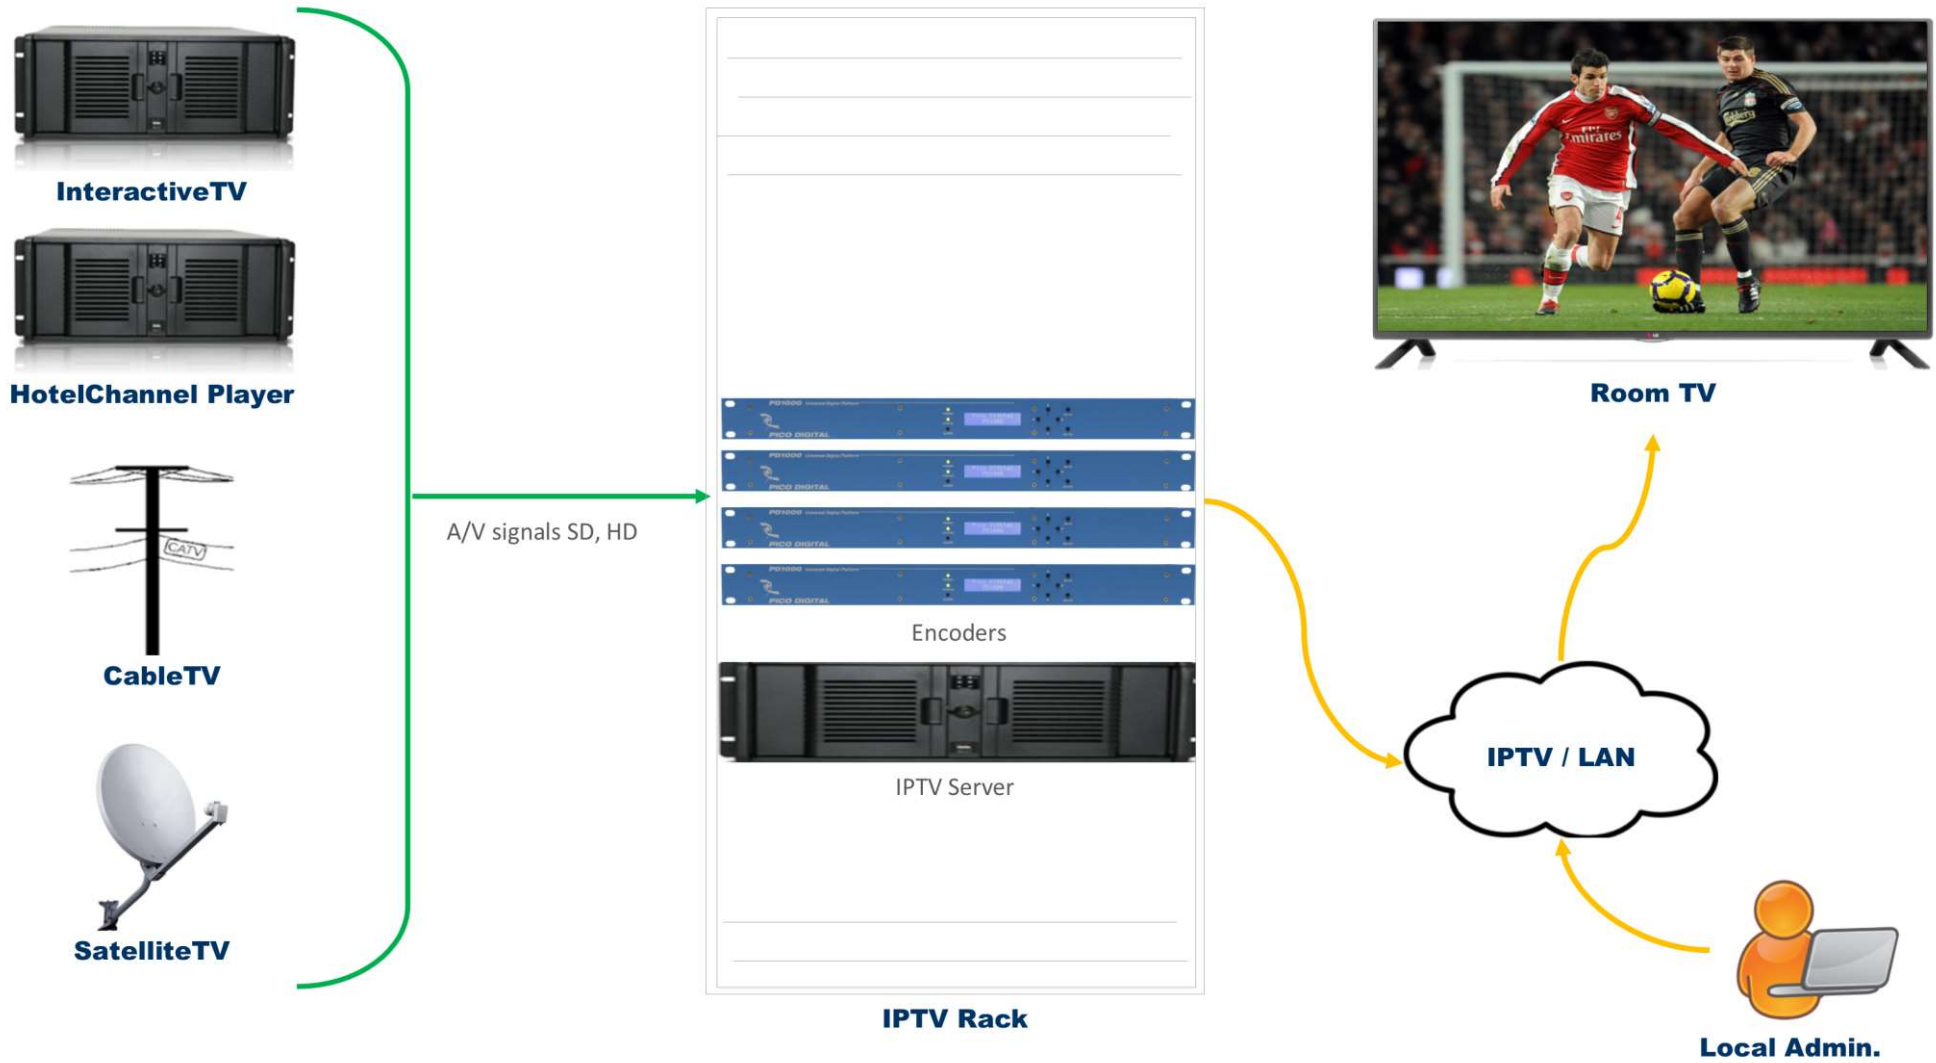

The hotel TV systems should be ready to include other channels or services along with the "Free To Guest" programming, even if they are produced internally or obtained by other methods as Satellite or OTT.

For hotels with existing TV networks that does not complies with the recent TV services, VISTA offers a certification process consisting in site survey, diagnosis and corrections proposal in order to "upgrade" and certify to be able to support all the modern TV services as 132 "Free to Guest" channels platform plus interactive services.

The hotel obtain an international certification supported by Pico Digital / VISTA!

MATV STRUCTURE (IPTV)
